Skylight Shutter Specifications

PREPARED BY	DOCUMENT	WINDOWS	VERSION
The Shutter Shop Ltd	Skylight Shutter Specifications	Velux & Fakro	2014 Version 1.1

01

Specification Overview

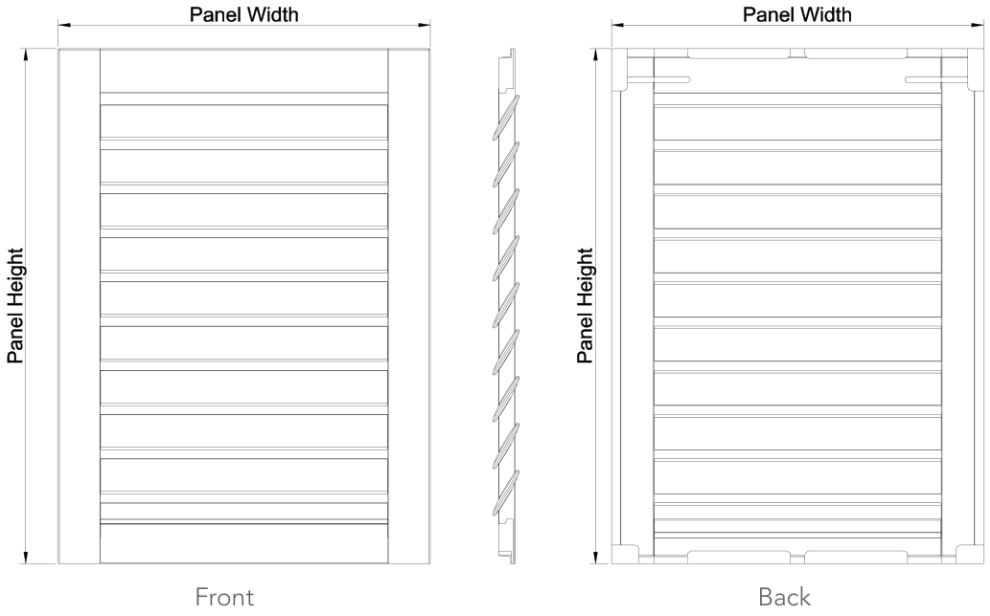

Introduction

Shuttershop are pleased to announce the new skylight shutter available in the most popular Velux and Fakro skylight window sizes.

The skylight shutter is supplied as a panel only. Additional hardware is supplied which is fixed to the actual skylight window itself and the skylight shutter panel is then attached to this.

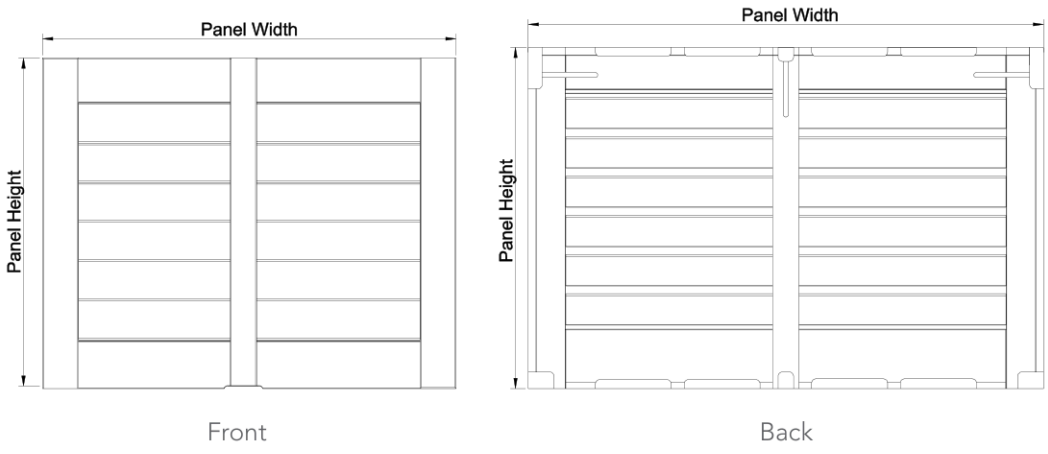

Material: Basswood

FOR VELUX

WITH VERTICAL CENTRE STILE

Wider skylights are automatically supplied with a vertical centre stile — see window size charts for more information as to which window sizes this applies to.

03

Window Size Chart

When selecting a skylight shutter you will initially need to choose which make of skylight shutter under the material drop down. Your options are either Velux skylight, Keylight Skylight or Fakro skylight.

Velux: GGL/GPL/GHL/GGU/GPU/GHU

Once selected please choose panel only under the installation option. Now under installation style please simply choose the model you require i.e C02. Now under "the type column" your choices are GGL/GPL/GHL/GGU/GPU/GHU. For Fakro and Keylight simply select your requirements from installation style drop down. This will automatically price and place the correct skylight shutter order.

FOR VELUX

05

Specification Overview

Colour Options

The skylight shutters are available in two colours only — see below. Should you want any other colour this is available at the standard custom colour surcharges.

COLOUR ID	COLOUR NAME
003	Silk White
253	Natural Pine

Custom colour is also available

Tilt Control Type

The skylight shutters are only available in silent (hidden) tilt with the gearing on the left.

Skylight Shutter Fitting Instructions

Your skylight shutter has been specifically designed for your Velux or Fakro skylight window. These instructions will help with the installation of your skylight shutter. Should you experience any difficulties please refer back to the retailer in the first instance.

Your skylight shutters comes in an 89mm louvre. The mechanism that tilts the louvres is hidden within the shutter itself. If you have the manually operated skylight shutter simply move one louvre and this will in turn move the rest. Should you have the remote control option simply select the louvre position you require and the louvre will move to this position automatically.
